

MISSION STATEMENT

The program is an initiative designed to deliver robust and holistic services centered on academic success, cultural awareness, and personal development of African American and other students.

PROGRAM GOALS

The Program at Moorpark College is a student-centered initiative that will increase the sense of belonging for African American and other students by way of a comprehensive, multi-pronged approach to the students' academic, cultural, and personal wellness and development on campus. The programs' primary concern is the academic success of the African-American students at Moorpark College, through increased retention, persistence, and completion rates. Raising cultural awareness for African-American and other students is also a goal of the program, as we believe identity development is crucial to development of the holistic student. Lastly, personal development of the whole student, including successful life strategies and how to prepare for life beyond Moorpark College is critical to our program goals.

STUDENT LIFE

BSU **BLACK STUDENT UNION**

The mission of this organization is to serve and unify the students of the African Diaspora at Moorpark College by providing enriching experiences and ensuring continuing development of a progressive environment which is conducive to underrepresented students in their quest to obtain a great qualitative and meaningful education.

A²MEND **(AFRICAN AMERICAN MEN** **EDUCATION NETWORKING AND** **DEVELOPMENT)**

A²MEND's mission is to work to ensure the interest and success of African American students, faculty, staff and administrators at California's community colleges. A²MEND educators utilize their scholarly and professional expertise to foster institutional change within the community college system to increase success of African American male students.
